Reading Comprehension

Blackwater Middle School is proud to announce its yearly science fair. This year is our 22nd Science Fair! The science fair will be held on March 3 at the Blackwater Middle School gymnasium. Students are encouraged to either perform an experiment, invent something, or write a report. Topics can range from environmental science, such as how pollution can change the climate, to health science. If you are interested, please stop by the science lab to register. Students must receive permission from their parents before registering. The last day to register will be February 1. In addition, all experiments must be performed under adult supervision. It is also important to remember to practice safety first. Safety goggles and masks are available for rent at the science lab. Principal Hall will be judging all the experiments this year. The winning experiment will win a trip for four to Orlando, Florida. This is a great opportunity for some hands-on learning. Although students are not required to participate, it is recommended that they attend the fair on March 3. We hope to see everyone there!

Choose true or false.

1. The Blackwater Middle School science fair is held every year. _____

2. The science fair will take place in the school cafeteria. _____

3. Students must ask their parents in order to participate. _____

4. Students can register for the science fair after February 1. _____

5. Students can rent safety equipment from the school. _____
