

SUBTRACTION GAME!

A large, stylized map of the African continent is the central focus. It is decorated with various animals: a monkey hanging from a branch in the top left, a lion, a giraffe, a zebra, a camel, an elephant, and a hippo. There are also some bushes and a small island to the southeast. A shark is swimming in the ocean to the west. A ship is in the ocean to the south. A compass rose is in the bottom left. The map is surrounded by blue waves and clouds. Five math problems are placed in white rounded rectangles on the map: $4 \times 13 =$ (top left), $6 \times 14 =$ (middle left), $3 \times 18 =$ (middle right), $7 \times 13 =$ (bottom right), and $8 \times 15 =$ (bottom center). The word "START" is written near the top right, and "FINISH" is written near the bottom right, next to the zebra.
