

PROBABILITY

Two dice are thrown together. The probability of getting

+	1	2	3	4	5	6
1	2	3	4	5	6	7
2	3	4	5	6	7	8
3	4	5	6	7	8	9
4	5	6	7	8	9	10
5	6	7	8	9	10	11
6	7	8	9	10	11	12

$$P(>2) = \frac{\quad}{36}$$

$$P(<11) = \frac{\quad}{36}$$

$$P(\geq 2) = \frac{\quad}{36}$$

$$P(\geq 12) = \frac{\quad}{36}$$

$$P(\leq 7) = \frac{\quad}{36}$$

$$P(<5) = \frac{\quad}{36}$$

$$P(\leq 5) = \frac{\quad}{36}$$

$$P(10) = \frac{\quad}{36}$$

$$P(12) = \frac{\quad}{36}$$

$$P(6) = \frac{\quad}{36}$$
