Name: _____ Date: _____

CIRCULATORY SYSTEM

1. Read the information from the left.
2. Complete the sentences using correct spelling.
3. Answer the questions.

This organ is called _____.

_____ take oxygen rich blood to all the body.

_____ take the blood with CO2 back to the heart.

Parts of the Circulatory system:

- Arteries
- Veins
- Heart

Function of the Heart:

The function of the heart is to pump oxygen and nutrient rich blood to the arteries that take it to all the body. On its way back to the heart, the blood that travels through our veins takes CO2 and other wastes back to the heart.

1. What does the heart do?

2. What are the names of the two kinds of tubes that carry our blood?

3. What are the three main parts of the circulatory system?

4. What is the difference between arteries and veins?
