How do robots know what to do?

Activity 7

Mariam and Ahmed are learning about Robots.

They learnt that a robot needs an **input** to produce an **output**.

Below is an example of a **house cleaning robot**.

Complete the activity below by selecting the **input, process, output** for this robot.

Input	Process	Output

Robot **decides** whether it is dirt or not.

Robot **cleans** up dirt.

Robot **scans** area for dirt.
