

NAMA: _____

KELAS: _____

KIRA LUAS.

FORMULA LUAS:

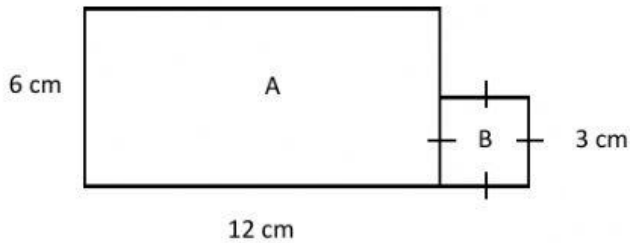

Luas segiempat
= panjang x lebar

Luas segitiga

$$= \frac{1}{2} \times \text{tapak} \times \text{tinggi} \quad \text{atau}$$

$$= \frac{\text{tapak} \times \text{tinggi}}{2}$$

1.

Luas A

$$= \text{_____ cm} \times \text{_____ cm}$$

$$= \text{_____ cm}^2$$

Luas B

$$= \text{_____ cm} \times \text{_____ cm}$$

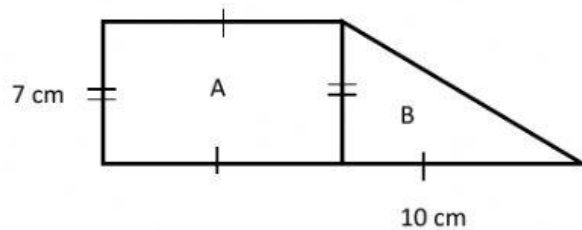

$$= \text{_____ cm}^2$$

Jumlah luas A + B

$$= \text{_____ cm}^2 + \text{_____ cm}^2$$

$$= \text{_____ cm}^2$$

2.

Luas A

$$= \text{_____ cm} \times \text{_____ cm}$$

$$= \text{_____ cm}^2$$

Luas B

$$= \frac{1}{2} \times \text{_____ cm} \times \text{_____ cm}$$

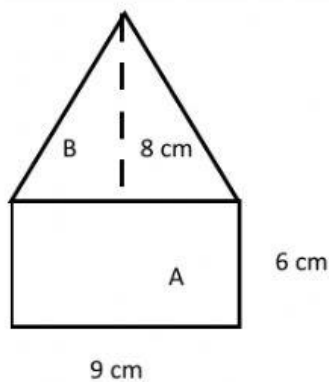

$$= \text{_____ cm}^2$$

Jumlah luas A + B

$$= \text{_____ cm}^2 + \text{_____ cm}^2$$

$$= \text{_____ cm}^2$$

3.

Luas A

$$= \text{_____ cm} \times \text{_____ cm}$$

$$= \text{_____ cm}^2$$

Luas B

$$= \frac{1}{2} \times \text{_____ cm} \times \text{_____ cm}$$

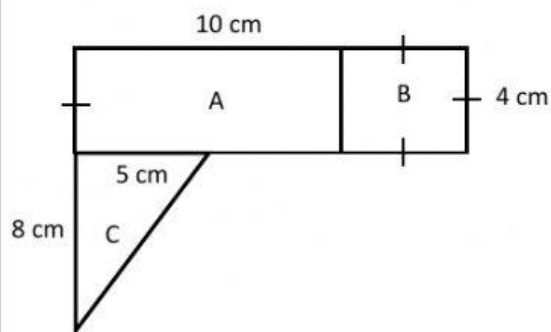

$$= \text{_____ cm}^2$$

Jumlah luas A + B

$$= \text{_____ cm}^2 + \text{_____ cm}^2$$

$$= \text{_____ cm}^2$$

4.

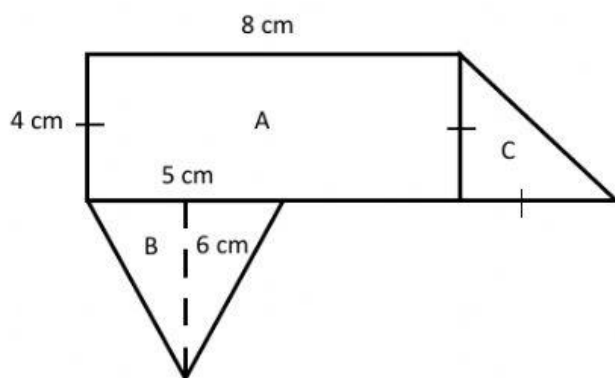

Luas A
 $= \text{___ cm} \times \text{___ cm}$
 $= \text{___ cm}^2$

Luas B
 $= \text{___ cm} \times \text{___ cm}$
 $= \text{___ cm}^2$

Luas C
 $= \frac{1}{2} \times \text{___ cm} \times \text{___ cm}$
 $= \text{___ cm}^2$

Jumlah luas A + B + C
 $= \text{___ cm}^2 + \text{___ cm}^2 + \text{___ cm}^2$
 $= \text{___ cm}^2$

5.

Luas A
 $= \text{___ cm} \times \text{___ cm}$
 $= \text{___ cm}^2$

Luas B
 $= \frac{1}{2} \times \text{___ cm} \times \text{___ cm}$
 $= \text{___ cm}^2$

Luas C
 $= \frac{1}{2} \times \text{___ cm} \times \text{___ cm}$
 $= \text{___ cm}^2$

Jumlah luas A + B + C
 $= \text{___ cm}^2 + \text{___ cm}^2 + \text{___ cm}^2$
 $= \text{___ cm}^2$
