4. A. accident B. space station C. traffic jam D. jet lag
5. A. explored B. persuaded C. discovered D. escaped

2. Read the passage and answer these questions. (5 points)

Earth Day is a day that is intended to inspire awareness and appreciation for the Earth's natural environment. On April 22, 1970, people all over the country made promises to help the environment—and the tradition continues. April 22, 2012 marks the 42nd anniversary of the first Earth Day. Earth Day is now coordinated globally by the Earth Day Network, and is celebrated in more than 175 countries every year.

There are so many ways to celebrate the Earth every day, but many like to take that extra step and do a little something more for the Earth on April 22 by planting a tree or participating in a community cleanup event. Planting trees helps to reduce greenhouse gas emissions, cleans pollutions, secures soil in place to prevent erosion, and provides homes for a lot of biodiversity. The San Diego County chapter of the Surfrider Foundation coordinates beach cleanups three times a month, including a North County beach, Moonlight Beach and a beach in South County.

Appreciate the Earth everyday by recycling, starting a compost pile, take public transportation, carpool, replace light bulbs with energy efficient bulbs, donate old electronics instead of throwing them away and having a garage sale.

1. What is the aim of celebrating the Earth Day?

.....

2. When did people start celebrating it?

.....

3. How many countries celebrate it?

.....

4. What can people do to protect the Earth?

.....
