Water is Life!

Fresh water is necessary for the survival of all living organisms on Earth. Our bodies are made up of about 60% water and we cannot survive more than a few days without it.

[Benjamin Jaramillo](#)

Water is a precious substance that meets our physical needs while at the same time being of great spiritual importance to many people. Water is also an integral part of many ecosystems that support us and other species.

[Sayuri Imbacuan](#)

Most of earth's water is 97% percent water that is found in oceans.

[Viviana Rodriguez](#)

Only 3% Fresh water

[Ariana Pulloquina](#)

Less than 1% is fresh water available for human use.
