

Directions: Let's make a paragraph today.

Why doughnuts are falling from the sky? And who could possibly do such a thing? Was it a magic wizard casting a spell somewhere? Or maybe aliens are coming and this is a gift from them? Next, you need to find a way to stop the doughnuts from falling down and filling up your town. Who could you ask for help? Is there a weather expert in your town that can help? Maybe you could find a witch or wizard to help you? Maybe search for a scientist who could fix this sweet doughnut problem? And finally, how will you clean up all the doughnuts around town? Can you cast a spell to make them disappear? Will you ask all the town people to help? Will you eat all the doughnuts yourself? Maybe you can wait until the rats and all the other animals eat all the doughnuts for you?
