Pop Quiz Homework

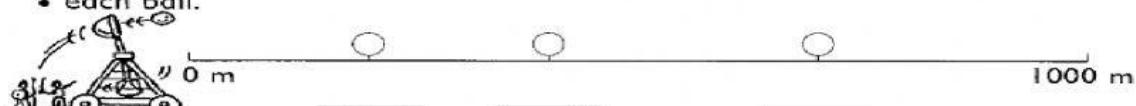

Exercise 1: (20 points)

Estimate the distance, in metres, from the start of the line to:

- each arrow

- each ball.

Exercise 2: (15 points)

Write the number in standard form:

- forty thousand, eight hundred sixty-five
- three hundred sixty-two thousand, one hundred seven
- six hundred seventy-nine thousand
- nine thousand
- five hundred thousand, two

Exercise 3: (15 points)

Write the place of the underlined digit. Then write its value.

- 252
- 6,939
- 36,945
- 319,675
- 812
- 9,326
- 81,469
- 654,389

Exercise 4: (20 points)

Complete these calculations:

$$(a) \quad 4.68 \times 100 = \boxed{}$$

$$(b) \quad 5700 + 1000 = \boxed{}$$

Exercise 5: (30 points)

The Earth is $4 \frac{1}{2}$ billion years old. Scientist divide the Earth's history into time periods according to the fossils they find in rock. Use the table of periods in Earth's history to solve the problems.

Time Period	When It Began
Late Triassic Period	225,000,000 years ago
Jurassic Period	213,000,000 years ago
Cretaceous Period	144,000,000 years ago
Tertiary Period	65,000,000 years ago

- Write the word name for the number that tells when the Tertiary period began.

- Which period began one hundred forty-four million years ago?

- Which two periods began more than two-hundred million years ago?
