THE SOLAR SISTEM

Eight planets go around the Sun. They are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

We call the Sun and its planets the Solar System. We live on the Earth. The Sun is not a planet. It's a star.

The Earth goes around the Sun and it also spins. That's why we hawe day and nigth. When the Earth turns towards the Sun, it becomes day. When it turns away from the Sun, it becomes nidht again.

☆

turns away — spins — turns towards

се върти — обърната към — се отвръща

Ask and answer:

What do we call the Sun and its planets?

Solar system Celestial system Planetary system

☆

There are [ ] **planets in the solar system.**

☆

Which planets are missing?
