Science websites with a difference

There are hundreds of websites about science on the web. We have chosen three which might be worth visiting.

A

www.science_made_easy.com

is specially designed for the younger audience. It explains some scientific problems in an easy way and includes lots of practical examples. It's also easy to navigate and has plenty of pictures and animations to show how things work. The website is an ideal place to inspire some scientific curiosity in young kids.

B

If you're looking for a science website which is not very serious, try

www.science_funfiles.org

It contains a collection of anecdotes and stories about scientists and their experiments which prove that even the smartest people can be quite silly at times. It also shows us how many important discoveries and inventions were made by chance!

C

www.science4U.com

is neither very simple or humorous. It's full of complex and detailed explanations of various scientific areas, with occasional graphics where necessary. A unique feature is the question box where visitors can post a question which will be answered by a specialist in the field. Perfect for older students looking for materials for their science projects.

This website

- 1** can easily make you laugh. _____
- 2** allows you to contact real scientists. _____
- 3** has more graphics than text. _____
- 4** can be a useful source for schoolwork. _____

Przeczytaj tekst o Liz Hartel. Uzupełnij luki 1–5 w notatce, którą wykorzystasz w szkolnej prezentacji. Notatkę należy uzupełnić w języku polskim.

Liz Hartel: a pioneer in horseback riding therapy

People have known about the positive effects of horse-riding on our health since ancient times, but the first professional therapeutic centres were created in Europe in the late 1960s. From there, the idea spread to North America. However, the person who inspired the modern idea of using horses in therapy was a Danish horse riding champion named Liz Hartel. She fell ill with polio at the age of 23

and, as a result, her legs below the knees were paralysed. She was determined to continue her riding career and she took part in the Olympic Games in 1952. Her silver medal there was the first medal for any woman in the history who competed against men. After she finished her riding career, Liz Hartel travelled a lot to raise money for people ill with polio and promoting the idea of riding as a form of therapy. The Dutch Liz Hartel Foundation was named after her.
