1.  = ...

2.  = ...

3.  = ...

4.  = ...

LIVEWORKSHEETS

III. Read and write.

Reading: The world in 2050

Read the texts and do the exercises

Samuel, 27

I think a lot of things will change in 2050. India will overtake China as the first largest economy in the world, but the country will have many problems with its demographics. The world will also have a lot of problems with the pollution and the climate changing. We will need to find other resources, because there will be more than nine billion people on Earth in 2050. We will also need to build spaceships to travel to the Moon and to Mars, because we will have to take resources from these places.

Lea, 25

Our world won't be the same in 2050. We will improve our technology and everybody will be able to speak at least five languages. People will live longer and we won't have health problems, because we will improve our knowledge on medicine. We will also live in peace and the different countries won't have nuclear weapons anymore. We will also have a single world government as we already have the *IMF* (*International Monetary Fund*). I think 2050 will be a great year for mankind!

What will the world look like in 2050? What do they think? Fill in the table!
