## Family Life

### Human Life Cycle

All human beings experience a series of growth stages during their lifetime (birth to old age).

#### Stages in the Human Life Cycle

Label the human life cycle using the words from the textbox.

<b>adulthood</b>	<b>childhood</b>	<b>prenatal</b>
<b>adolescence</b>	<b>infancy</b>	

1. \_\_\_\_\_ - **Nine months before birth to birth (0-9 months)**
  - This is when a fertilized egg is in the mother's womb.
  - Most rapid growth period taking place inside the mother's body.
2. \_\_\_\_\_ - **Birth until two years (birth-2 yrs.)**
  - Body becomes bigger and stronger (changes from an infant to a toddler)
3. \_\_\_\_\_ - **toddler to school age years (three years to ten years (3-10 yrs.))**
  - Mastery of skills and independence
  - Learning and getting ready for school
4. \_\_\_\_\_ - **eleven to eighteen plus years (11-18 yrs.)**
  - Rapid mental, emotional, and physical growth, and development
5. \_\_\_\_\_ - **Nineteen years until death (19-until death)**
  - Physical growth ceases, but growth continues mentally, emotionally, and socially
  - Physical abilities decline with age
