The perfect exercise

JOHN FLEMING | 12 April 2020

Lots of people think that they need to join a gym or start running if they want to do more exercise and be healthier, but walking is very good for you. In fact, many people think walking is better than any other form of exercise.

Walking is a great way to exercise because it's simple, it's free and you can do it anywhere. Most people of all ages can walk for exercise and all you need is a pair of comfortable shoes. It's easy to make walking part of your daily life, for example, you can walk part of the way to work or walk to the shops. You don't need to walk for a long time – a fast walk for half an hour a day helps you get stronger, healthier and have more energy.

As well as being good for your body, walking is also really good for your mental health. It helps you feel less stressed and happier. It also helps you sleep better and make new friends. You also spend more time outside when you're walking and spending more time in places like parks or forests has lots of mental health benefits.
