

Types of play matching activity

1. Match the different types of child play to their corresponding description.

The 6 Stages of Play

Play

0-3 months

When baby is making movements with their arms, legs, hands, feet, etc. They are learning about and discovering how their body moves.

Play

0-2 years

When a child plays alone and are not interested in playing with others quite yet.

Behavior

2 years

When a child watches and observes other children playing but will not play with them.

Play

2+ years

When a child plays alongside or near to others but does not play with them.

Play

3-4 years

When a child starts to interact with others during play, but there is not much cooperation required. For example, kids playing on the playground but doing different things.

Cooperative Play

4+ years

When a child plays with others and has interest in both the activity and other children involved in playing.
