

Mount Taal, Manilla, Philippines

Mount Taal is a famous volcano near Manilla, in the Philippines. Mount Taal is on an island in a big lake.

Mount Taal is not a high volcano. It is only about 311m high. It is very steep (陡), so it is called a cinder cone volcano.

It has unique scenery (獨特的風景) and many people ride in boats around the volcano. But, they have to be very careful!

Mount Taal is an active volcano (活火山) and can erupt (爆發) at any time. The last big eruption was in 2022. Many houses were damaged (被損壞) by the flying ash and lava, and 39 people died. Many animals on the island also died during the eruption.

Mount Taal is a very powerful and dangerous volcano!
