Planets (A2 Flyers Reading Part 4)

Read the text. Choose the right words and write them on the lines.

Planets

Example We live on one <u>of</u> eight planets. The name of our planet is Earth. The other

1 seven planets are _____ Mars, Mercury, Venus, Neptune, Uranus, Jupiter, and Saturn. The planets are like big balls of rock and

2 metal that _____ go around the sun. The sun is not a planet but a very big star.

3 Jupiter is bigger _____ the other planets, with sixteen moons. Mercury is the smallest planet and the nearest planet to the sun. It does

4 not have _____ moons. It is also very hot. Uranus is the coldest planet because it is very far from the sun.

5 Our planet Earth is _____ Venus and Mars, but they are far from

6 us. Rockets take _____ very long time to go from one planet to

7 another. Earth is the only planet _____ things grow, and people

8 and animals live. Some people think that there are people _____

9 animals on some of the other planets. No one has ever _____ to the

10 other planets. People _____ go to visit other planets in the future.
