

WHAT MAKES THE EARTH AN ACTIVE PLANET?

1. Label the layers of the Earth. Drag and drop the words from the wordbox.

MANTLE	ATMOSPHERE	OUTER CORE	HYDROSPHERE
INNER CORE	CRUST	BIOSPHERE	

2. Match the name of the layer with its description.

ATMOSPHERE	It is the part of the Earth where life exists.
HYDROSPHERE	It is the thinnest, outer part of the geosphere.
BIOSPHERE	It is all the Earth's water.
CRUST	It is a mixture of gases.
MANTLE	It is at the center of the geosphere
CORE	It consists of the middle layers of the geosphere.

3. Read the description of the natural hazard and write its name. Remember: DO NOT USE CAPITAL LETTERS.

- _____ happen when heavy rain causes a body of water to overflow.
