Leonardo Da Vinci wanted to fly. He spent a lot of time observing birds. His first flying machines were called ornithopters. There were large and small models. The engine of the ornithopters was the pilot, who had to move his arms with force, like the birds, to be able to make the machine fly. Of course, it did not work and Leonardo understood that humans were different from birds and they could not fly.

1. Leonardo created only one model of ornithopter. ☐

2. Leonardo understood that humans and birds were different. ☐

3. Ornithopters were a complete success. ☐

4. Leonardo understood that humans and birds were different. ☐
