_____   _____   _____   _____

_____   _____   _____   _____

_____   _____

Fill in the correct word.

They have large hollow bodies with a sound hole just below the strings. The wooden front of the guitar

is called the "soundboard." It's made of thin wood, often

spruce or red cedar, which is chosen for its sound quality.

The first guitars ever made—sometime in the 1500s—

were _____.

They have thinner, solid bodies without sound holes. As a

result, the electric guitar does not transmit and amplify

sound on its own. Have you ever strummed the strings of

an electric guitar that wasn't plugged in? If so, you were barely able to hear any sound.

_____ were first made in the 1920s. They have had a huge impact on the worldwide

popularity of the guitar.

_____ can be defined as a musical instrument with strings that get hammered via a

manual keyboard; sounds can be altered through the use of pedals or how lightly or forcefully one

taps the keys. It is regarded as the most popular

instrument around the world because it is incredibly

versatile and can be used in multitudes of musical

genres.

On the other hand, _____ are digital

instruments, require electricity to be played, and

produce their sound by way of a synthesizer rather than by strings and hammers. This allows them to

be smaller and more cost-effective.
