

Examen

Valor posicional

1. Descompón cada número.

$$\blacktriangleright 1.536 = \square \text{DM} + \square \text{UM} + \square \text{C} + \square \text{D} + \square \text{U}$$

$$\blacktriangleright 50.365 = \square \text{DM} + \square \text{UM} + \square \text{C} + \square \text{D} + \square \text{U}$$

$$\blacktriangleright 583 = \square \text{DM} + \square \text{UM} + \square \text{C} + \square \text{D} + \square \text{U}$$

$$\blacktriangleright 2.369 = \square \text{DM} + \square \text{UM} + \square \text{C} + \square \text{D} + \square \text{U}$$

$$\blacktriangleright 85.963 = \square \text{DM} + \square \text{UM} + \square \text{C} + \square \text{D} + \square \text{U}$$

2. Suma y completa. (Posiciona el punto en el espacio correcto)

$$\blacktriangleright 20.000 + 8.000 + 600 + 60 + 9 =$$

$$\blacktriangleright 1.000 + 400 + 30 + 0 =$$

$$\blacktriangleright 900 + 60 + 8 =$$

$$\blacktriangleright 50.000 + 1.000 + 900 + 40 + 8 =$$

$$\blacktriangleright 8.000 + 600 + 00 + 5 =$$

3. Escribe como se lee el número.

$$\blacktriangleright 10.251:$$

$$\blacktriangleright 3.569:$$

$$\blacktriangleright 841:$$

$$\blacktriangleright 9.502:$$

$$\blacktriangleright 12.507:$$

Multipliación

1. Resuelve las siguientes operaciones aritmética de una cifra.

► $24 \times 2 =$

► $15 \times 5 =$

► $102 \times 3 =$

► $36 \times 3 =$

► $236 \times 4 =$

► $501 \times 2 =$

2. Resuelve las siguientes operaciones aritmética de dos cifras.

2 4 1 3

$$\begin{array}{r} \times 15 \\ + \\ \hline \end{array}$$

5 0 3 6

$$\begin{array}{r} \times 24 \\ + \\ \hline \end{array}$$

7 8 2 5

$$\begin{array}{r} \times 30 \\ + \\ \hline \end{array}$$

5 2 3

$$\begin{array}{r} \times 23 \\ + \\ \hline \end{array}$$

2 3 6

$$\begin{array}{r} \times 13 \\ + \\ \hline \end{array}$$

1 0 5

$$\begin{array}{r} \times 43 \\ + \\ \hline \end{array}$$

División

1. Realiza las siguientes divisiones de caja, aplicando la resta.

▶ $15 \div 5 =$

▶ $30 \div 3 =$

▶ $24 \div 2 =$

▶ $12 \div 1 =$

▶ $60 \div 6 =$

▶ $32 \div 4 =$

2. Realiza las siguientes divisiones de caja, aplicando la resta.

$$\begin{array}{r} 109 \overline{)2} \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \end{array}$$

$$\begin{array}{r} 560 \overline{)5} \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \end{array}$$

$$\begin{array}{r} 3693 \overline{)3} \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \end{array}$$

$$\begin{array}{r} 224 \overline{)4} \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \\ \underline{00} \\ 00 \end{array}$$
