Sample Items for the Comprehensive Test of Second Grade

1. General considerations

- Elaborate one model example of an item to explain to the students how they have to proceed during the test. This example can be explained in Spanish.
- Let students know what school items or materials they need for the test.
- Create a safe environment by telling students that this is only an assessment to find out about what they already know of English.
- The items should be guided by the English teacher since students have basic reading skills in this grade. That means that instructions should be read in English and Spanish.
- Items and options should be read to them in English by the teacher.
- Follow all procedures established in the document titled La Priebe Escrita when giving students the written test.
- Give students enough time to pick the right answer for each item. Give students any necessary support as they are taking the test.
