

Listening: a class discussion

The Ocean Food Chain

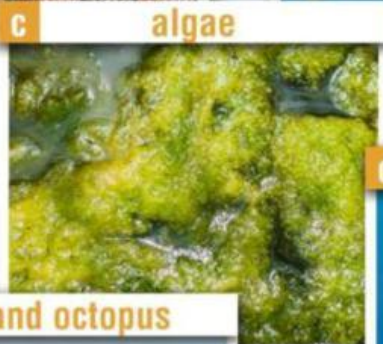

a shellfish

b large fish

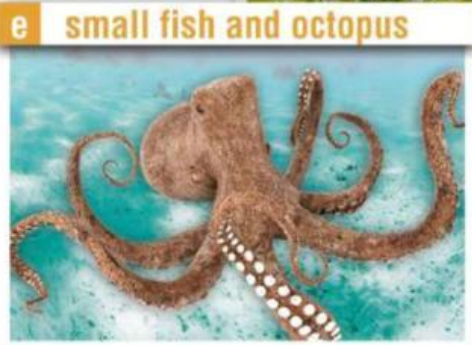

c algae

d shark

e small fish and octopus

Who eats who in the ocean? Put the pictures of the ocean food chain in the order you think is correct. Choose the correct answer. A group of students are on a class trip to an aquarium. Listen to Part 1 of their discussion with their guide, and check your answers.

1. shellfish
2. large fish
3. algae
4. shark
5. small fish and octopus

Listen to Part 2 of the discussion and complete the poster. Type the answers.

WHAT WOULD HAPPEN IF THERE WERE NO SHARKS?

The number of big fish would ¹... ,
while small fish and shellfish would ²... .

The ³... would get out of control, kill
⁴... and fish, and ⁵... the water.

Humans would have no ⁶... to eat.
