

What can you conclude from the situations below?

Lily enjoys school, but she finds Mathematics a little difficult. She had a test on Thursday and she had been practising hard for it. Lily and her family went out to dinner on Friday. Her parents told her that they were very proud of her. What can you conclude?

- ★ Lily is a good student.
- ★ Lily did well in her Mathematics test.
- ★ Lily needs more practice in Mathematics.
- ★ Lily and her family enjoy going out to dinner.

Gary was excited that he was going camping with Bobby. He was about to leave his house when the phone rang. The call was from Bobby. When Gary put down the phone, he sighed and kept quiet. What can you conclude about the situation?

- ★ Bobby could not go on the camping trip.
- ★ Bobby reminded Gary to bring along his fishing rod.
- ★ Gary's father told him he was going to take him camping.
- ★ Gary's mother told him to be careful when he went hiking.

Mum drove me to the netball match yesterday. She stopped the car several times to look at the map. She even stopped at a petrol station to ask for help. When we finally got to the venue, the game was about to start. Which of these conclusions can you draw based on the passage?

- ★ The girl was not good at playing netball.
- ★ The girl was not looking forward to the netball match.
- ★ The girl and her mum got lost on the way to the game.
- ★ The girl and her mum had car trouble on the way to the game.
