ENGLISH ASSIGNMENT

DIAGNOSTIC PERIOD – 2024-

SCHOOL: 4-054 Juan Isidro Maza COURSE: 5°1°

1- Complete the sentences using ***will*** or ***won't*** and the verbs in brackets.

a- Don't get up! I _____(answer) the phone.

b- You're studying a lot. I think you_____(pass) the exam.

c- If the weather is fine, the plane _____(fly).

d- It's Jane birthday tomorrow, she _____(be) 10.

e- My brother forgot his wallet, he _____(buy) any snack.

f- They are on holidays, so they _____(come) to the party.

2- Read the chart and write sentences using ***definitely/ definitely not / probably/ probably not***.

LIFE IN 2050	
1-Robots / **be** / more intelligent than humans	Definitely not
2-The cell phone / **exist**	Probably not
3-Humans / **live** / on Mars	Probably
4-Climate change / **be** / a problem	Definitely

1- _____

2- _____

3- _____

4- _____

Our biggest challenges (part 1)

In the future, our planet will face many challenges. But will they come from space, the Earth, or even from ourselves?

Space

On February 15, 2013, an asteroid entered the Earth's atmosphere over Russia. When it exploded, 30 km above the ground, it was traveling at about 65,000 km/h. Many glass windows broke in the explosion and about 1,000 people were injured. The largest piece of the asteroid landed in a lake. Many scientists think that another large asteroid will hit the Earth one day. It will probably land in the ocean, and it will cause floods.

The Earth

From March to May, 2010, a volcanic eruption in Iceland created an enormous cloud over Europe. It didn't cause any injuries or disease, but planes couldn't fly for more than a week. The eruption cost $7.3 billion. But that was just a normal volcano. Supervolcanoes are over 1,000 times bigger. There is one under Yellowstone Park in the U.S. It is about the same size as Mount Everest. One day, it will erupt!

Humans

By 2050, experts think there will be over 9.7 billion people on the planet. They worry that many people won't have food, water, or homes. Cities will become more crowded; traffic and pollution will get worse. More people will use more energy, and this will cause climate change, too. Is overpopulation our biggest challenge?

3- Read and circle the correct answer.

1- The asteroid…

a- exploded on the ground.

b- hit Russia 30 km from the city.

c-broke windows in buildings.

2- The volcano in Iceland…

a- was a supervolcano

b- hurt lots of people.

c- caused problems for travellers.

3- The article says that…

a-experts think that cities are bad places to live.

b- climate change will be a big problem.

c- people don't have the energy they need.

4- Read again and choose the correct word.

a- The asteroid in Russia hurt about **1,000** /**100,000** people.

b- For three **years** / **months**, there was an enormous cloud over it.

c- The Yellowstone Park **volcano** / **eruption** is the size of Mount Everest.

d- The **population** / **experts** of the world will be 9.7 billion in 2050.
