Unit 5 CB page 51 46

Speaker 1 I think the invention is the telephone. Before the telephone, people to speak to , or they had to . But now, we can just the phone and speak to our friends and family they live

Speaker 2 I think that the aeroplane is the most important invention because you can . You can fly to the of the world and see really that people couldn't see before. You can understand how people live and see so many amazing things.

Speaker 3 I think paper is the most important invention. Before paper, people into stone. The stones were very . Paper was much better. And we know a lot about things that in history because they were on paper! That's really important.

Speaker 4 I think the computer is definitely the most important invention. You can on the Internet really quickly. You can write things on it and your information. It has changed the way people do things in and in schools. I do lots of my homework on the computer now.
