

Multiplicación de Fracciones

Recuerda que para multiplicar fracciones:

1 Se multiplican numeradores y denominadores entre sí.

2 $\frac{4}{5}$ Denominador
Numerador

$$\frac{7}{9} * \frac{8}{5} = \frac{7 * 8}{9 * 5} = \frac{56}{45}$$

$$1. \frac{8}{5} * \frac{7}{4} = \frac{\boxed{} * \boxed{}}{\boxed{} * \boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$2. \frac{6}{9} * \frac{3}{2} = \frac{\boxed{} * \boxed{}}{\boxed{} * \boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$3. \frac{9}{7} * \frac{8}{4} = \frac{\boxed{} * \boxed{}}{\boxed{} * \boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$4. \frac{5}{8} * \frac{2}{6} = \frac{\boxed{} * \boxed{}}{\boxed{} * \boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$5. \frac{12}{8} * \frac{4}{8} = \frac{\boxed{} * \boxed{}}{\boxed{} * \boxed{}} = \frac{\boxed{}}{\boxed{}}$$
