Green Miles West

The substitution of "West" in our name replacing "California" is the result of an agreement we reached with California Gardening Association, following a protest over the original use of "California" in our name. We hope this does not create any confusion among our loyal customers. While this represent a change from our initial name introduction, it does not change the quality of products we offer our customers

History of the Wright Brothers

Wilbur and Orville Wright, famously called The Wright Brothers, were the pioneers of aviation. The brothers invented the first fully practical aeroplane in 1905. Two years before they made the first aeroplane, they invented the first powered, sustained, and controlled aeroplane flight.

Wilbur Wright was born on April 16, 1867. He was born near Millville, Indiana. The younger brother, Orville Wright, was born in 1871. The family had five children with Wilbur Wright was the middle child.

Their father, Milton Wright, often left his family because of his job. His occupation was a bishop. He often bought back small toys for his children when he got home from his journey. One day in 1878, Milton brought back a small model helicopter made of cork, bamboo, and paper. The toy helicopter was powered by a rubber band to twirl its blades. The toy's design was based on the French aeronautical pioneer, Alphonse Pénaud. The Wright Brother was fascinated by the toy and its mechanics. Because of that, they pursued their interests in aeronautics and flying.

LIVEWORKSHEETS

Years after that, the Wright Brothers invented the wings design that is able to fly an aeroplane. Their invention was based on how birds angled their wings for balance and control. They were trying to emulate how birds fly which later developed a concept called "wing warping". They succeeded in flying their first plane after adding a moveable rudder to their prototype on December 17, 1903. Wilbur was the pilot of that historical flight. He flew their plane for 59 seconds at 852 feet.

However, their success was not appreciated. The press, as well as fellow flight experts, were reluctant to give the Wright Brothers acknowledgment. With that, Wilbur decided to go to Europe in 1908. He got more credits there. People also gave good response about their achievements. Orville joined his brother in Europe in 1909 along with Katharine, their younger sister.

The Wright Brother became popular in Europe. They had the celebrity status. They even got hosted by royals and heads of state. They also constantly got featured in the press.

Before returning to the United States in 1909, they began to sell their aeroplanes. Their successful invention leads to them became wealthy businessmen. They were filling contracts for aeroplanes in Europe and the United States.

Text for No. 21-30

My idol

Afgan has always been my favorite singer. I had always been thinking of how I would feel when I met him. Then I was suddenly hit by lightning when I found out Afgan was coming to town for a concert in a local auditorium. A day before the concert, there would be a meet and-greet event at a local radio station. Feeling excited, I packed all my Afgan's CDs to get his signature at the event.

On that bright and sunny Saturday morning, the radio station was full of Afganism (that's how Afgan's fans are called). They sat on the chairs prepared inside the radio station's lobby. Some stood in rows in the front yard of the radio station. A spot inside a lobby was prepared with a mini stage for Afgan's singing performance and a table for Afgan to sign Afganism's memorabilia. Finally, after about 40 or 50 minutes wait, Afgan showed up from inside the radio station. He smiled and waved to all Afganism who had been waiting excitedly saying, "Good morning. How are you all?" The crowd went crazy. The shouts sounded like a mix of "Fine, thank you" and screams of Afgan's name.

hen, he started the event by singing his hit single "Dia dia dia".

Afganism went even crazier; they sang along with him throughout the song. Of course, I did too. I couldn't take my eyes off this amazing singer who had released three albums. When he was finished with the song, the host announced that it was time for autographing the memorabilia. I prepared my CDs and began to stand in the line. When I arrived at the table, I was speechless. It was unreal just seeing him that close. I thought it was really cool seeing him like that because he really just felt like a normal person, which was awesome. He asked my name so that he could write it on the CD to say "To Mia, Love Afgan". He was also very friendly, so I didn't feel too nervous when I had a chance to take pictures with him.

He was just an amazing person. That was one of the best days in my personal life history.
