A. is to follow B. class rules C. won't D. get

34. If her idea to put the recycling bin in the class is accepted, fewer plastic bottles will thrown away on the school yard

A. to put B. fewer C. will thrown D. on

LIVEWORKSHEETS

35. Will it possible for children to learn from home if we have a good internet system?

A. will it possible B. to learn C. have D. internet system

IV. READING Read the passage and decide whether the sentences are True (T) or False (F).

As children, we can do many things to save fresh water. Firstly, you can save showers rather than baths. Short showers use less water and also there is less use of energy to heat the water. However not keeping yourself clean is NOT an option. Secondly, clean your teeth by putting water into a glass. Use the water for wetting your toothbrush, rinsing your mouth and cleaning, your brush. You can also help your family save water by using a watering can to water plants and vegetables in the garden rather than using a hose. Maybe you could help recycle the water from the washing machine. And you can help your school save water by switching off taps properly and using the water fountain for drinking water.

(Source:http://cyh.com/HealthTopics/HealthTopicDetailsKids.aspx?p=335&np=288&id=2651)

	T	F
36. Using showers can save more water than baths.		
37. You shouldn't use a glass of water for cleaning your teeth.		
38. A hose should be used to water plants and vegetables.		
39. The water from the washing machine should be used for other things.		
40. You should switch off the taps properly to help save water at school.		

Read the following passage and choose the option (A, B, C or D) that best answers each of the questions below.

Reduce, Reuse, Recycle - three great ways YOU can eliminate waste and protect your environment!

Recycle - don't just toss everything in the trash. Lots of things (like cans, bottles, paper, and cardboard) can be remade into either the same kind of thing or new products. Making new items from recycled ones also takes less energy and fewer resources than making products from brand new materials.

Reduce - to make something smaller or use less, resulting in a smaller amount of Waste. You can practice reduction by buying less and using less.

Reuse - You can "reuse" every day! When you use things like plastic cups, plates, and plastic food storage bags, don't throw them away! Wash and reuse them-most of them will last for a long time with many uses.

Practicing all three of these activities every day is not only important for a healthy environment, but it can also be fun too.

(Source: https:/kids.niehs.nih.gov/topics/reduce/index.htm)

41. By recycling, reducing, reusing, you can _____

A. have more waste and protect the environment B. have less waste and protect the environment

C. have more waste and more money D. have less waste and less money
