     C. You can keeping the refrigerator door closed by save energy.  
     D. You can save energy by keeping the refrigerator door closed.

### Reading 1, T/F

In Western countries, electricity, gas, and water are not luxuries but necessities. Companies now realize that consumers want products that will not only work effectively, but also save money.

For most North American households, lighting accounts for 10 percent to 15 percent of the electricity bill. However, this amount can be reduced by replacing an ordinary 100-watt light bulb with an energy-saving bulb. These bulbs use a quarter of the electricity of standard bulbs and last eight times longer. Therefore, consumers can save about US\$7 to US\$21 bulb.

1. Consumers only want products which work effectively.
2. In most North American, families use from 10 to 15 percent for the lighting of the electricity bill.
3. People can reduce the amount of the lighting by replacing an ordinary 100-watt light bulb with an energy-saving bulb.
4. An energy-saving bulb only use a quarter of the electricity of a standard bulb.
5. A saving-energy bulb can use as long as a standard bulb.
6. Mrs. Hoa uses only two ordinary bulbs and she pays US\$8 for lighting. If she replaces two saving-energy bulbs, she will pay US\$4.
