Amran joins the basketball team in his school. He is one of the best players there. However, this is not something he achieved easily. He has to practice hard and pay close attention to his diet.

One of the most important things for an athlete is energy. Carbohydrate is known as a good energy source, so Amran consumes a lot of it. For breakfast, he always has a plateful of rice and to accompany it, sometimes he has eggs or beef. He also drinks a glass of milk and mineral water. Amran does not always have rice for lunch, though. Sometimes he has potatoes or pasta. He also has chicken and vegetables to go with it. Amran drinks a lot because his body needs water to replace the liquid loss he experiences during practice. His dinner is more or less the same with his lunch: it is high in carbohydrate, protein, and mineral.
