

Watch the video and complete the True/False exercise below:

1. A customer gets their receipt to their bank account.
2. If you don't need a chosen product, you have to delete it from your virtual cart manually.
3. To pay for your groceries you have to wait in a queue.
4. You can pick up any product and just leave the shop.
5. The app will update your cart automatically.
6. You need to be ready to show your ID when you leave the shop.
7. Just Walk Out technology charges the customer's Amazon account automatically.
8. Machine learning and AI were used to create this technology.
9. To enter the shop you need to use only the Amazon Go app.
