

# NÚMEROS AMIGABLES

## PARA SUMAR Y RESTAR

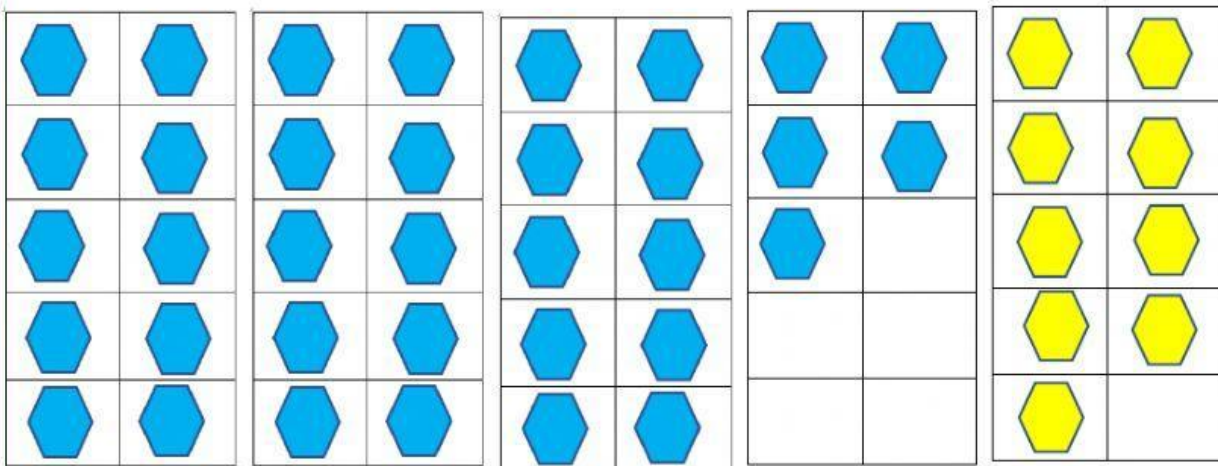

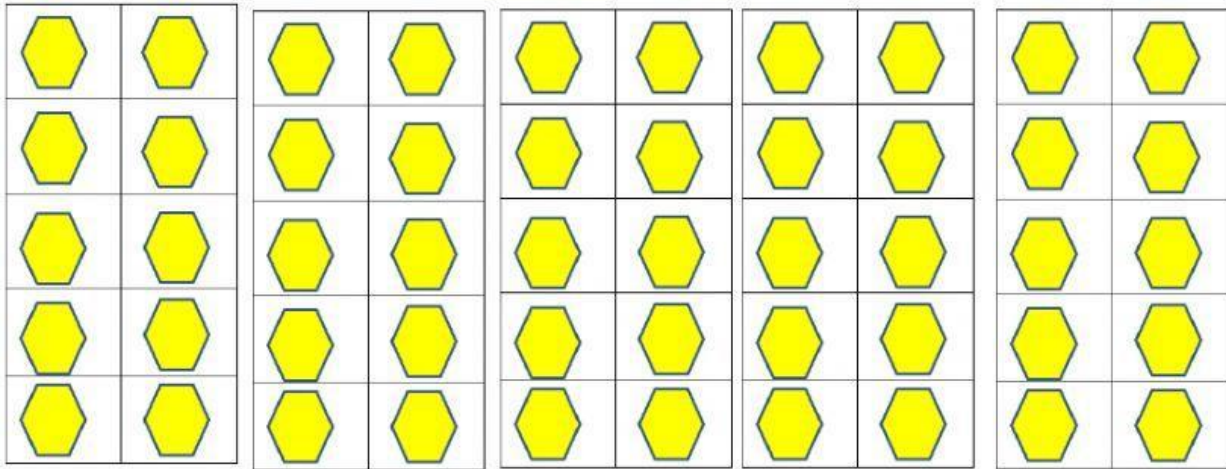

Usa el método de Paula (tal como se mostró en el vídeo) para realizar las siguientes sumas:

$$23 + 49 = \square + \square = \square$$

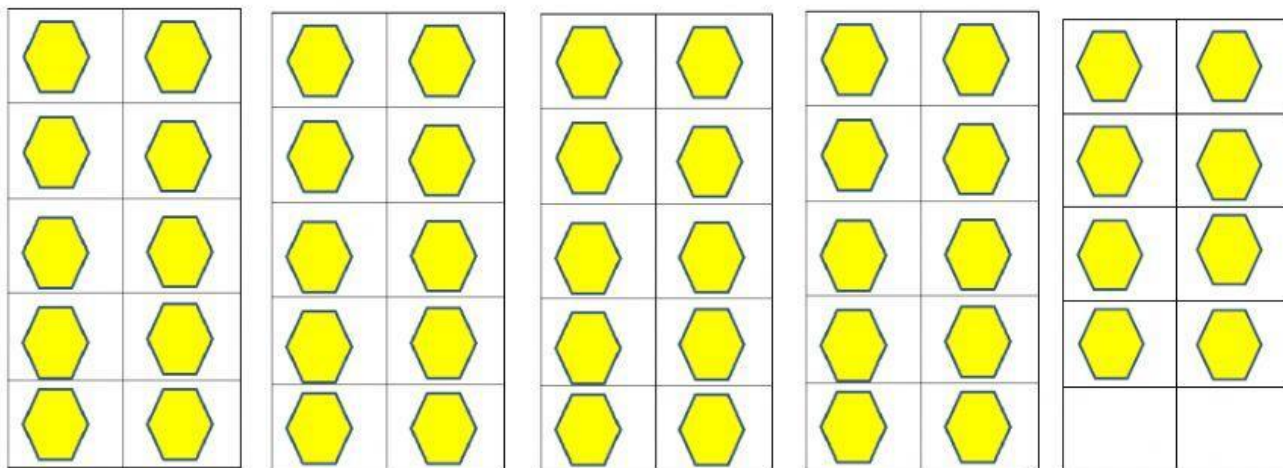

$$59 + 35 = \square + \square = \square$$

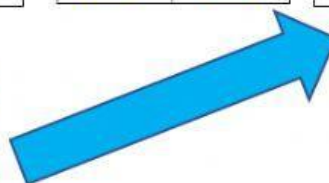

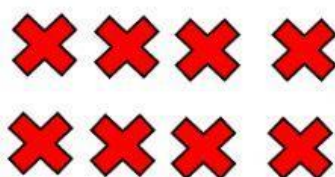

Mueve las fichas azules de este recuadro y completa la decena de color amarillo-

Usa el método de Tere (tal como se mostró en el vídeo) para realizar las siguientes **restas**:

$$48 - 9 = \square - \square = \square$$

1. Mueve las tachas rojas a las fichas amarillas para dejar un número amigable (decenas cerradas).

$$33 - 9 = \square - \square = \square$$
