Queen of the Night

It is well known that most flowers bloom in the daytime and close up their petals at night. But did you know that there are some flowers that bloom only at night? In the deserts near Tucson, Arizona, there is a type of cactus called 'Arizona's Queen of the Night'. This plant hides an incredible secret. For most of the year, it looks like a typical cactus. But then, for only one night of the year, every Queen of the Night produces an amazing display of sweet-smelling, white flowers. By morning, the flowers have gone.

1. Generally, plants flower **during the day / at night**.
2. Arizona's Queen of the Night is a **desert / plant**.
3. The Queen of the Night blooms **every night / for one night only**.
4. You **can / can't** see the flowers the following day.
