INSTRUCTION: Label the diagram by choosing the correct term/s.

2. Shape of trajectory

6. Path taken by a projectile

1. An object that is given initial velocity and acted solely by a gravitational force

3. Maximum vertical distance reaches by a projectile

$\vec{s}$

$\vec{y}$

θ

$\vec{x}$

y

x

4. A numerical value in degree; expressing the orientation of a projectile to be projected

5. horizontal distance covered by projectile
