I think my future will be very different from my ancestors' life. First of all, people **1** with their mind. Nothing **2** as before. Human like robots will be mass produced and **3** in factories. They **4** human emotions. Everyone will be **5** online through an implant in the brain. I **6** from the same diseases as my grandparents because people **7** nanotechnology to destroy viruses. However, I strongly believe that humans **8** how to respect our world and **9** to living in small communities, away from the cities. We **10** the past come back to life by cloning extinct species like the **11** And we **12** any species to extinction ever again. We **13** the mistakes of the past! I truly believe that humans **14** the best of both worlds: technology and harmony with mother earth. I really hope this **15** my life!
