1-) Complete the next concept map using the words inside the box:

EUKARYOTES	FUNGI	EUBACTERIA	PROTIST	ANIMAL
PLANTS	ARCHAEBACTERIA		UNICELLULAR	CHITIN

2-) complete the “mentefacto conceptual” based on the next information:

Birds are a group of warm-blooded vertebrates different from mammals, characterised by feathers, toothless beaked jaws, the laying of hard-shelled eggs, a high metabolic rate, a four-chambered heart, and a strong yet lightweight skeleton. this group of animals has has two subdivisions: the Palaeognathae, which includes the flightless ratites (such as the ostriches) and the weak-flying tinamous, and the extremely diverse Neognathae, containing all other birds.
