

D: Good morning! Lets get down to business.	
	D: Getting up to making those small adjustments is going to be hard for our small company.
	F: First, we have to get over our cash issues. Much of the construction uses marble structures.
	F: It's not expensive is the changes are small adjustments.
	D: Marble! Isn't changing either the marble work or the structure just as expensive as rebuilding?
F: I know but we have to get up to doing it. We can't get by on doing small jobs. We need bigger Projects.	

<p>D: Okay, but if we could just slow down. We need to get over some major issues.</p>	
	<p>F: Costs. Hmmm. Yes, much of the changes expensive but we can get around to that at the end.</p>
	<p>D: First, we have to get over our cash issues. Much of the construction uses marble structures. Costs are important.</p>
	<p>D: The second issue is the size. This sounds like a big project.</p>
	<p>F: What major issues do you think we need to get over?</p>
<p>F: I know but we have to get up to doing it. We can't get by on doing small jobs. We need bigger Projects.</p>
