

5.- Write the numbers in order.

### Life cycle of an angiosperm

-The ovary then grows into a fruit with seeds. The petals fall off. \_\_\_\_\_

-The new plants produce flowers. \_\_\_\_\_

-Pollen goes into the stigma down to the ovary. \_\_\_\_\_

-The seeds can germinate and new plants grow. \_\_\_\_\_

-A seed develops inside the ovary. \_\_\_\_\_

-The fruit falls, opens and releases the seeds. \_\_\_\_\_
