

Student's name:	Class/Section:
Subject: Physics	NGSS: HS.PS2
Lesson Title: Fluids	Date:
Objective: Describe a Fluid	

Q1. Define a Fluid.

Q2. What will happen to the density of the object when: (Mention The relationship between variables).

- We Increase the volume of the object. density _____. And they are _____ Proportional.
- We increase the mass of the object. density _____. And they are _____ Proportional.

Q3. Name two unique properties for liquids.

Q4. Which of the following statements is Correct and which is Incorrect:

- 1- Surface Tension is the fluid surface strength ()
- 2- Gases have a fixed volume and no fixed shape ()
- 3- Viscosity is a property for gases ()
- 4- Gases Expand when heat is Applied ()
- 5- Liquids can be easily compressed ()
- 6- Liquids have a fixed volume and no fixed shape ()

Q5. What is the difference between a gas and a liquid?

Value: Charity in schools fosters empathy and social responsibility among students, promoting a sense of community and altruism. Inside classrooms, incorporating charity initiatives cultivates a culture of giving, teaching students the importance of compassion and making a positive impact on the world around them.
