

Exercise 1. Fill in the blanks with ONE word / number.

Climate change is one of the most (1) _____ things for our planet. Many politicians and scientists say it is the biggest (2) _____ we face. I read almost every day that climate change is changing the Earth forever. Many species of animal, fish, insect, frog, etc. are dying. The ice caps in the Arctic and Antarctica are melting. Our weather is changing so places are getting warmer, or colder, or are having more and stronger (3) _____.

We all need to do our bit so that climate change does not destroy us. It's important to cut down on things that produce greenhouse gasses. These warm the planet and change the climate. Doing simple things like turning off lights and (4) _____ paper all help.

Exercise 2. Fill in the blanks with ONE word / number.

Electricity is one of the most important (1) _____ ever. It is the thing that powers the Earth. If there was no electricity, we'd be back in the dark ages. Few people stop and think just how (2) _____ electricity is. With the flick of a switch, you can power almost anything. Think about what would happen if there was no electricity. We'd have no TV, no computers, no traffic (3) _____.

It would be like going back to living in caves. There are a few negative points about electricity, of course. Number one, it's dangerous. Thousands of people die each year from electrocuting themselves or in electrical fires. And number two, it isn't good for the (4) _____. Most electricity comes from burning coal and that creates greenhouse gasses.
