Near the end of the 19th century, several Europeans and Americans tried to make movies. No one knows who made the first one. New York City had the first movie theatre in 1894. People put money in a small machine and looked into it at the movie. By 1900, movies were popular all over Europe and the United States. They were not very good, but people liked them because they were new and different.

Every year people invented ways to make movies better. They invented machines to show the pictures on a screen. Then everyone could see the motion pictures on the front wall of a theatre instead of
