EXPOSITION TEXT

KEEPING THE CLASS SAFE AND HEALTHY

In our classroom, we hold the power to nurture a safe and clean environment, a sanctuary where learning thrives and respect for our planet blossoms.

Every action we take, from the way we handle waste to how we use resources, shapes the world around us. By keeping our classroom tidy and free from litter, we not only create a more pleasant space for everyone but also show our commitment to caring for our shared home.

If we nurture a culture of respect for our surroundings, we can ensure that our classroom remains a haven for learning and growth. If we dispose of waste responsibly, recycle diligently, and conserve resources like water and electricity, we can protect the delicate balance of nature within our classroom walls.

If we embrace the beauty of nature, we'll understand the importance of safeguarding 'it'. If we witness the magic of a blooming plant or the tranquility of a clear stream, we'll be inspired to cherish and protect our environment with fervor.

Simple habits, like recycling paper and plastics or turning off lights when they're not needed, can make a big difference. By practicing these small acts of stewardship, we demonstrate our dedication to preserving the environment for future generations.

Let's work together to keep our classroom clean and safe, for the benefit of all who inhabit it and the planet we call home.

9. 'If we embrace the beauty of nature, we'll understand the importance of safeguarding it.' What type of 'if' clause is in the sentence above?
