NOTE: If you cannot access the link, your teacher will help you with the script.

Interesting facts

Did you know that a linguist is a scientist of language? Many people think that a linguist is someone who dedicates their life to learning many languages. No, that person is called a **polyglot**. A linguist is someone who studies the many different aspects of languages in a scientific way through experiments and observations. Linguists study things like how the brain works with language (psycholinguistics), how men and women or people from different places speak differently (sociolinguistics), the sounds of language (phonology), and other issues related to language.
