

Force and Motion

Select the correct answer

motion	How fast an object is moving
friction	Change of velocity over time
energy transfer	is the force that cause things to move
collision	Is the tendency of an object in motion to remain in motion or rest to remain in rest
inertia	any push or pull
force	Occurs when two or more object hit each other with a force
velocity	is a force between surface that slow or stop an object form moving
energy	Is a change in a object position
acceleration	is the speed at which something move in one direction
speed	is the movement of energy from one object ti another

Answer Sheet

Force and Motion

Select the correct answer

1	motion	10	How fast an object is moving
2	friction	9	Change of velocity over time
3	energy transfer	8	is the force that cause things to move
4	collision	5	Is the tendency of an object in motion to remain in motion or rest to remain in rest
5	inertia	6	any push or pull
6	force	4	Occurs when two or more object hit each other with a force
7	velocity	2	is a force between surface that
