Warm up

A restaurant serves its slices of pizza as $\frac{1}{6}$ of a whole pizza.

How many slices of pizza can the restaurant serve from 2 whole pizzas? Use the representation to solve.

A forest preserve posts a mile-marker sign every $\frac{1}{4}$ mile. How many markers are there along a 5-mile trail?

A. $\frac{4}{5}$ signs

B. $\frac{5}{4}$ signs

C. 9 signs

D. 20 signs

$$\frac{1}{6} \div 2 = 12$$

$$2 \div \frac{1}{6} = 12$$
