**Warm up**

A restaurant serves its slices of pizza as  $\frac{1}{6}$  of a whole pizza.  
How many slices of pizza can the restaurant serve from 2 whole pizzas? Use the representation to solve.

A forest preserve posts a mile-marker sign every  $\frac{1}{4}$  mile. How many markers are there along a 5-mile trail?

- A.  $\frac{4}{5}$  signs                      B.  $\frac{5}{4}$  signs  
C. 9 signs                         D. 20 signs

$$\frac{1}{6} \div 2 = 12$$

$$2 \div \frac{1}{6} = 12$$
