help

eruption

violently

destroyed

A volcano in the South Pacific erupted (1) \_\_\_\_\_ last Saturday. It hit Tonga, an island country in the area. The eruption sent a cloud of ash and gas into the air. People could see this cloud from 20 kilometres away. The (2) \_\_\_\_\_ also caused a tsunami which flooded properties in Tonga's capital. Besides, it (3) \_\_\_\_\_ hundreds of homes on some small islands. More than twenty people on these islands are still missing. New Zealand sent two big ships to Tonga to (4) \_\_\_\_\_ the victims yesterday.

**Read the passage about life on other planets and tick (✓) True or False in the following sentences. (1m)**

Most scientists believe that for another planet to have life on it, it must be similar to Earth in several ways. It is likely to need an atmosphere (air) and water. It also must orbit a star, like the Sun, at a good distance. This star would provide the right amount of light and heat for life to exist.

Scientists have studied planets and moons in our solar system to see if they can support life. Space probes have searched for traces of bacteria or other tiny living things on Mars. Some scientists are

also looking for the possibility of life outside our solar system. Using radio telescopes, they hope to capture signals from intelligent aliens.

So far, no evidence of extraterrestrial life has been found. However, scientists have discovered hundreds of planets that orbit distant stars. Some of these planets are an ideal distance from their stars, and some are roughly the size of Earth. It may be possible that life has developed on one or more of them.

	TRUE	FALSE
5. Most scientists believe that a life supporting planet must be somewhat similar to Earth.		
6. Space probes have searched for traces of human or other tiny living things on Mars.		
7. The scientists use radio telescopes to capture signals from creatures on other planets.		
8. The scientists think that if a sun is the right distance from a planet, the planet could support life.		

#### D. WRITING (2MS)

##### Find the mistake and correct it. (0.5ms)

1. I could deal with their problem, but I don't know what to do with me.

\_\_\_\_\_ ⇒ \_\_\_\_\_
