

HOW DOES CLIMATE CHANGE AFFECT US?

1. Type in how climate change affects us: health impacts, migrations, decreased in food production, destruction of houses and infrastructures. **Remember: DO NOT USE CAPITAL LETTERS.**

2. Match the climate change problems with their definitions.

HEALTH IMPACTS
MIGRATIONS
DECREASE IN FOOD PRODUCTION
DESTRUCTION OF HOUSES AND INFRASTRUCTURES

Many people around the world have lost their homes in floods, hurricanes, etc.
There is less food available.
People die from heatwaves, droughts and floods.
Extreme weather events force people to migrate.

3. Look at the following pictures and write the type of climate action you can see: using renewable energy sources, recycling waste, reducing consumption of plastic. Remember: **DO NOT USE CAPITAL LETTERS**

4. Read the descriptions and write the type of climate action: using renewable energy sources, recycling waste, reducing consumption of plastic. Remember: **DO NOT USE CAPITAL LETTERS**

- This type of climate action reduces rubbish and energy use.

- There are campaigns to reduce the use of plastic packaging.

- We are moving to cleaner energy sources, such as wind and sunlight.
